La Mesta
Chemistry **AET group**

CHEMISTRY.

A well-known specialist in chemical process optimization and industrial-scale production, La Mesta is your guarantee of innovative, proven know-how.

- Process development
- Process Industrialization
- Batch production with reactors from 1,000 to 27,000 liters
- Continuous flow production: Raptor® technology
- 2 industrial production sites

Chemsis
Engineering **AET group**

ENGINEERING.

With engineering expertise in the fields of chemistry, fine chemicals, pharmaceutical and biotechnology industries, refining and energy, Chemsis designs, builds and installs your facilities, from the initial concept right down to the project management and validation process.

- Process and equipment design, structures, piping and detailed design
- Process control system, instrumentation, electricity
- Equipment integration, utilities, revamping, clean rooms
