

## Visit us at Chemspec 10 in Berlin !

La Mesta will be exhibiting in Chemspec 10 which will be held in Messe, Berlin, Germany on June 9<sup>th</sup> and 10<sup>th</sup>, 2010.

**La Mesta** is a custom synthesis company offering specific capabilities based on **AET Group** know-how in **Chemical engineering** and **continuous systems**.

For example, Raptor® continuous system allows considering high flow rate productions and hazardous or exothermic reactions to occur in a safe way, reducing solvent volume, increasing reaction selectivity.

We also can offer our know-how in Sodium Azide chemistry with our JV Valmesta and in Phosgenation with our **new integrated phosgene generator** coupled with our Raptor technology.

With **2 industrial production sites**, La Mesta aims to have a different approach to this chemistry in addition to the batch traditional processes already existing on the market place.

Come and stop by our booth **H36** for more information !
