

## Visit us at Informex 2010 in San Francisco !

**La Mesta** will be exhibiting at Informex which will be held in San Francisco, CA, USA on February 16-19, 2010 at the Moscone Center.

**La Mesta** is a *custom synthesis* company offering specific capabilities based on AET Group know-how in Chemical engineering and continuous systems. For example, **Raptor (R) continuous system** allows considering high flow rate productions and hazardous or exothermic reactions to occur in a safe way, reducing solvent volume, increasing reaction selectivity. We also can offer our know-how in **Sodium Azide chemistry with our JV Valmesta** and in **Phosgenation with our new integrated phosgene generator coupled with our Raptor (R) technology**.

With **2 industrial production sites**, La Mesta aims to have a different approach to this chemistry in addition to the batch traditional processes already existing on the market place

**AET Group** is a French medium size company specialized in development, process industrialization and production of intermediates and active ingredients for pharmaceutical industry, flavor and fragrances industry, cosmetic and photo industries.

Using its double expertise in chemical engineering with **Chemsis** (located near Lyon and near Geneva) and in organic synthesis with **La Mesta** (located near Nice and in Chalon Sur Saône), AET Group offers innovative technologies and also very specific reaction know-how.

Come and stop by our booth **2318** for more information !
